PROJECTS

2022/12	**Attendence using Face Recognition** 🔗
	• A **Python** application that marks attendance by scanning their face.
	• We used **Open CV** library to scan user face and store the data.
	• The face data consists of a list of **nodal points** which is pickled and dumped in a **file system.**
	• The application scans the face and compares it with data in the file, it marks attendance only if the face **matches 95%**.
2023/03	**Personal Portfolio** 🔗
	• My **Personal Portfolio**, which was designed and developed by me.
	• Used **HTML, CSS** and designed this portfolio website.
	• Made it **responsive in design**, so it can fit with variety of devices.
	• It showcases my **Front-end skills** and presentation skills.
